PAPER - III : COMMODITY DERIVATIVES TRADING, FUTURES AND OPTIONS STRATEGIES

Futures Trading Strategies

Futures strategies. Various types of time spreads are analyzed - e.g. simple calendar spread, butterfly and condor. The student learns to price, execute and risk manage future strategies. The risks and p / l behind each strategy are thoroughly investigated. An understanding of the concepts of cash and carry and reverse cash and carry (otherwise known as backwardation and contango) are a pre-requisite for this section of the course. Students are also given a refresher on intra-commodity futures spreads -e.g. crack spread, C crush spread.

Volatility

Discussion of option strategies, reviews on volatility. The aim is to provide students with the knowledge with which to analyze volatility and implement / change trading decisions based on their expectations of volatility. The importance of curve management is also stressed.

Basic Options strategies

Option strategies. Basic option strategies are analyzed : straddle, strangle, call / put bull / bear spread, and conversion/reversal. The students learn to price, execute, and risk manage these option strategies. The risks and p / l behind each strategy are thoroughly investigated.

Complex options strategies

More complex option strategies : box, time spread, put / call backspread, butterfly, ladder and condor. The class aims to cement the students' understanding of the theoretical and numerical aspects of trading strategies. Armed with the previous weeks' numerical and theoretical knowledge, students are able to begin to use the tools required to execute and risk manage strategies based upon their trading / investment decisions

TRADING

● Electronic commodities markets

Reviews on electronically traded commodities markets, focusing on the more practical aspects of the business, including: exchanges, products, software vendors, clearing and delivery. Students are also made aware of the physical or underlying markets which may in some instances be traded electronically either through a principal to principal model or a central counter party. Introduced to OTC markets.

● Trading simulation

Interact with the available electronic trading software and implement the theory and trading strategies. These strategies will be implemented from a market maker's perspective on the Web Portal of the Institute.

● Trading day

Aim to replicate a trading day on a commodity futures and options exchange on a simulated model in the Web portal. The session would utilize whatever fully integrated simulated / real time technology is available in the trading laboratory. Students will effectively trade in a simulated exchange environment using the skills taught throughout the course.
